CARTIWELL

Parameter information	
Total Weight	1.2Ton
Bucket capacity	0.022m³
Rated output power/speed	7.6/3000kw/r/min
Maximum travel speed	1.2 km/h
Swing speed	9 rpm
Maximum climbing ability	30°
Maximum digging force	6.5kN
Overall width	2285（2030）mm
Scope of work	2490unit

Max. digging height	1745mm
Max. unloading height	1725mm
Max. digging depth	1700mm
Max. digging distance	1490mm
Max. bulldozing height	240mm
Total length	2870mm
Total width	930mm

CARTIWELL ALL TERRAIN EXCAVATORS

CW-12S

CARTIWELL CW-12S compact excavator gives you the Performance and efficiency you need in tight spaces.

Note: ue to technological uparades, the actual product may bedferent trom whatis shown.Diagrams， pohotos,and infor-mationare for reference only.

CW-12S

MULTIFUNCTIONAL MINI EXCAVATOR

POWERFUL
CREATIVITY
SECURITY

Grapple

Break Hammer

Ripper

Auger

Rake

Wide Bucket

▶ Auxiliary means

Can quickly replace a variety of auxiliary tools, such as breaking hammer, grasping wood, hydraulic scissors and so on. Expand the application scope of excavators, and make them play a role in different engineering fields.

Technical highlights

Simple operation——accurate and flexible mining ability

▶ Energy-efficient engine

The engine has strong power and low fuel consumption, so you can choose Briggs & Stratton XR2100 or KOOP 192 engine, which can efficiently complete excavation, handling and other operations .

ENGINE COMPARTMENT

The back cover can be opened for daily maintenance.

HYDRAULIC CYLINDER

The hydraulic system can accurately control the excavation action.

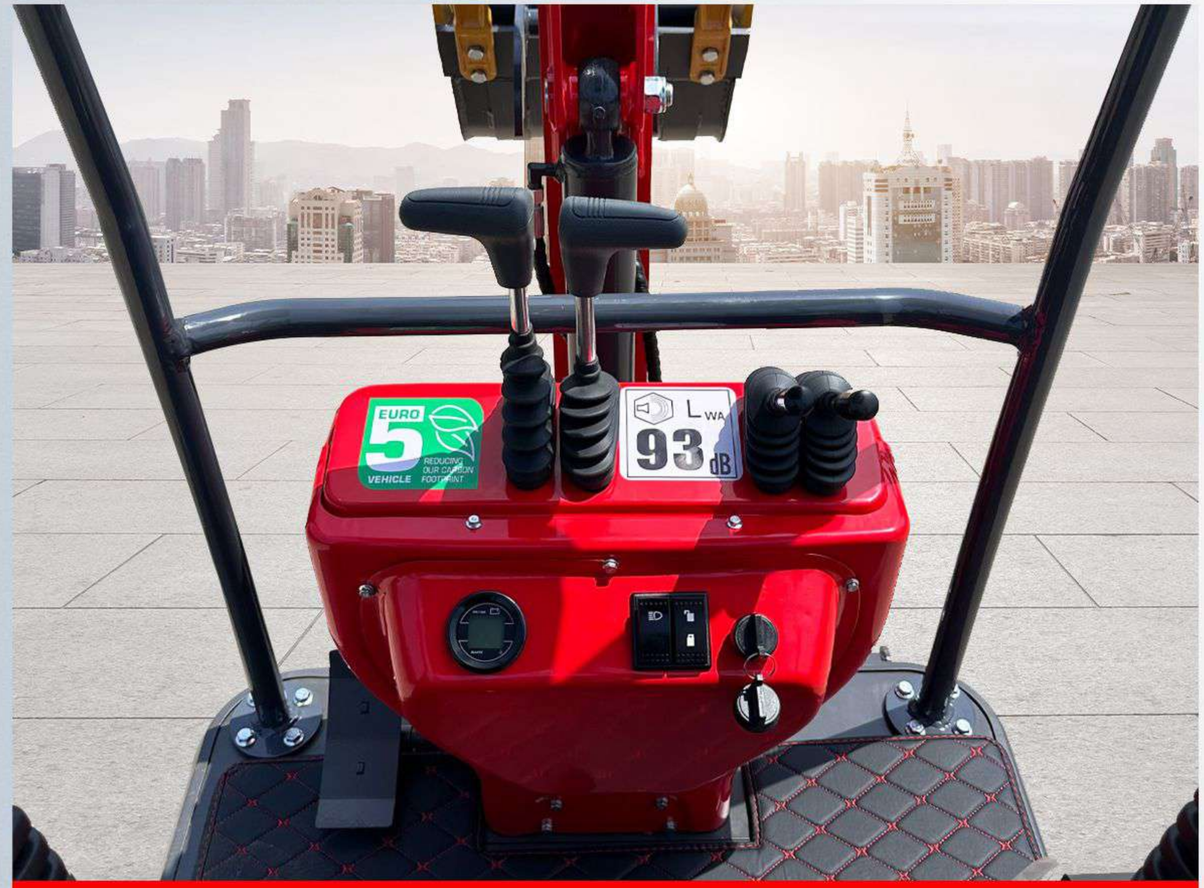

RUBBER TRACK

The track has excellent stability and passability, strong grip and can adapt to all kinds of terrain.

BIG ARM SIDE SWING

The suspender can swing left and right, so as to easily cope with the narrow space.

COMFORTABLE OPERATING ENVIRONMENT

With wide field of vision design, you can clearly observe the working area. The ergonomic chair is equipped with a high-quality shock absorption system, the operating handle is arranged reasonably and simply, and the foot rest area is large, which provides a comfortable operating space for the driver and improves the overall working efficiency.

Front LED highlight work light

Lamps and lanterns are installed at the front end of the boom, which can adjust the lighting angle synchronously with the boom, and always provide lighting along the working direction of the bucket, without any dead angle of lighting, and can clearly illuminate the working surface no matter whether the boom is raised, lowered or excavated.

User-Friendly Operation

The two main driving control levers control the boom, bucket, bucket and slewing function smoothly, so that the operator can perform fine tasks with high precision.

Hydraulic stop valve

Pressure system protection device-hydraulic cut-off valve Precise sealing structure, safe isolation of oil circuit, effectively prevent hydraulic oil leakage, ensure the pressure stability of hydraulic system, and avoid power decline or failure caused by leakage.

User-Friendly Operation

The two main driving control levers control the boom, bucket, bucket and slewing function smoothly, so that the operator can perform fine tasks with high precision.

Easy-Access Engine Compartment & Rear Chassis

The rear of the fuselage is equipped with an openable access door, which adopts a quick-release hinge structure and can be quickly opened without special tools, making the daily inspection, maintenance and repair of core components such as engine, air filter and oil circuit simple and efficient.
